

FIRST FOREST CLUBHOUSE

Beijing, China

CLIENT: **Beijing Capital Group**

DATE: **2003**

SCALE: **800m²**

Near the 2008 Olympic site in Beijing, China, this building is the first in a series of commercial buildings situated along a winding pedestrian street in the newly master planned community of First Forest.

The developers' goal was to create a focal point for the project that is uniquely modern and distinctively Canadian. The clear glass cone supported by a Canadian manufactured glulam structure creates

a large interior display and gathering space overlooking the community entrance, plaza, a waterfall and reflecting pool.
