

HON THI ISLAND GOLF RESORT

Nha Trang, Vietnam

CLIENT: **Millennium International Group**

DATE: **2009**

SIZE: **290ha**

EKISTICS was asked to design a master plan for a luxury 5-Star 150 room hotel complemented by a variety of private hillside and sea-fronting villas with a multitude of recreational options to explore the islands' incredible beauty. The primary amenity of the resort is an 18-hole championship golf course located in the low lands of Hon Thi island providing a series of spectacular waterfront golf holes. The arrival to the island is accommodated

by a marina that serves both recreational boating and essential transportation of passenger and cargo to the island. Sensitive site planning locates the single family villas in prominent hillside locations providing most homes with golf course and ocean views. Buildings are carefully integrated into the dramatic natural environment limiting development to create an ecologically sensitive design maximizing the amenity of the natural environment.
