Located in Guangxi, the Beihai ENJOY Oceanfront Residential Resort is envisioned as an innovative development located on the scenic coastline within the Marine Technology Park WL District. Once a key trade port in the maritime silk road, Beihai hosts the famous Silver Beach.

The site is located along XiCun harbor, with a sensitive tidal estuary landscape ecology compelling the development to provide an ecologically responsible design.

The site's dramatic waterfront location and close proximity to Beihai make it an ideal location in which to develop a new town organized around innovative and progressive design principles. Ocean views, beachfront access and a resort lifestyle will encourage a successful community.
